Why your child may not get a grade 9 in GCSEs

(even if they're top of the class)

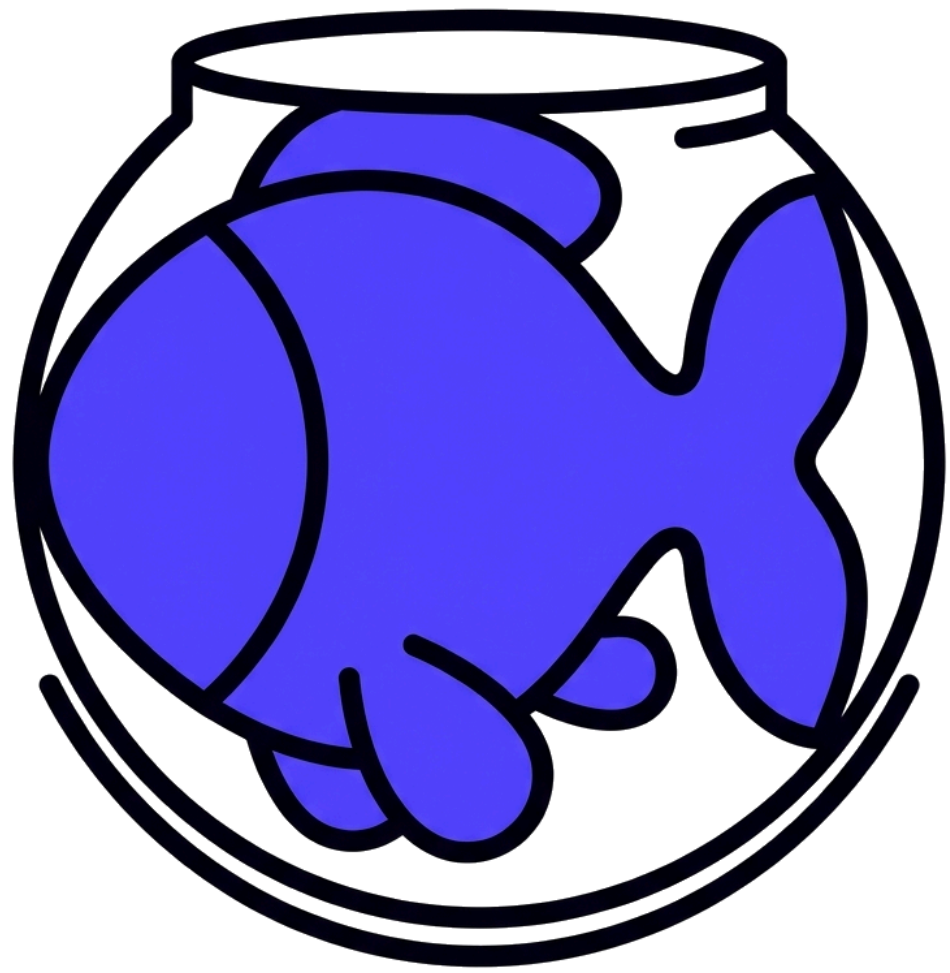

Usman Rana

Ucademy

Your child is **the biggest fish** in the pond.

Top set, top table, best in the year. It feels like they're winning.

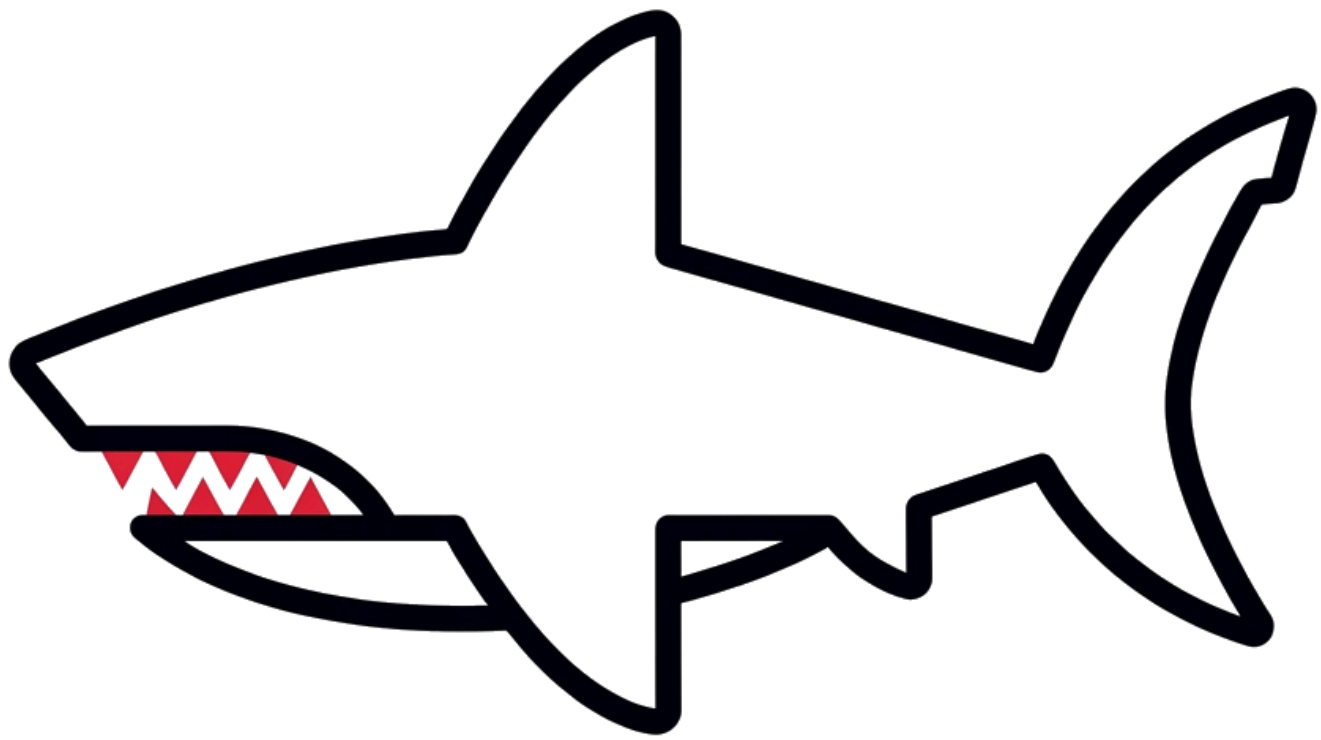

But they only compare to their own class.

The one who revises for an hour looks like the hardest worker in the school. For now.

The real competition is in other ponds.

In the other ponds are the kids at Eton and Harrow. Your child never competes against them. We do.

Ucademy

Top-school kids do 70 past papers. Most do 5.

They aren't cleverer. They finish the syllabus a year early, then drill past papers until the grade is automatic.

Ucademy

So a top-set grade isn't a grade 9.

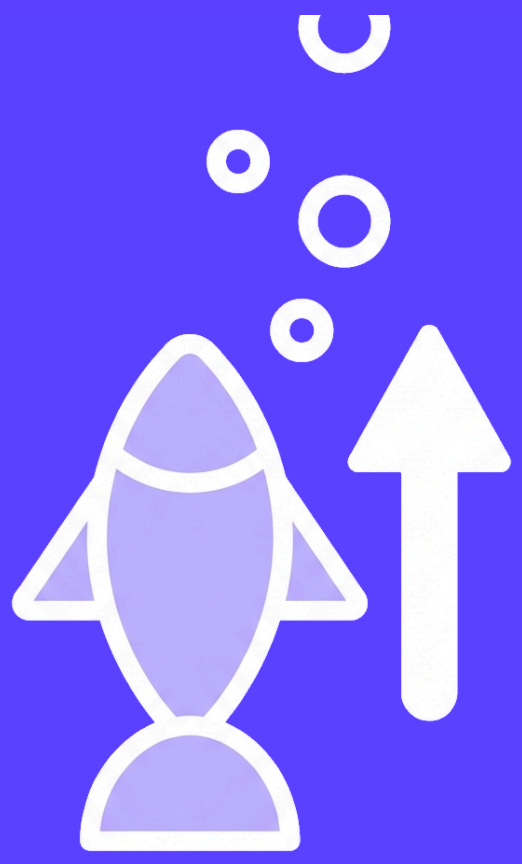

A high mark in their class only proves they beat the room they're in, not the country they'll be ranked against.

Find a bigger pond.

We measure your child against the best in the country, not just their class.
